

HOW TO CALCULATE

There is only one correct way to calculate your Life Path number. You must reduce each of the three components of your birthdate to a single digit or Master Number.

LET'S TAKE AN EXAMPLE: **JUNE 20, 1938**

STEP 1: REDUCE THE MONTH

The month of June is a 6 so it remains as a single digit

STEP 2: REDUCE THE DATE

The date is 20, so we add $2+0=2$ for your Day number

STEP 3: REDUCE THE YEAR

$1 + 9 + 3 + 8 = 21$, which is still double digits and is not a Master Number, so we reduce it further $2+1=3$

STEP 4: ADD RESULTING DIGITS

Add the three resulting numbers and reduce them to a single digit or Master Number

$$6 \text{ (month)} + 2 \text{ (day)} + 3 \text{ (year)} = 11$$

THE LIFE PATH FOR THIS BIRTH DATE IS 11 AND A MASTER NUMBER.
